CONTENT

Technology Advantages

Product Features

Advantage 1: Support outdoor identification up to 100,000 lux light

- By improving S/N ratio and optimizing algorithm, even under 100,000 lux light, RMSL can still get the depth information clearly to rebuild the 3D space.

p.s. RMSL means *Rockchip module Structured light*.

Other Module

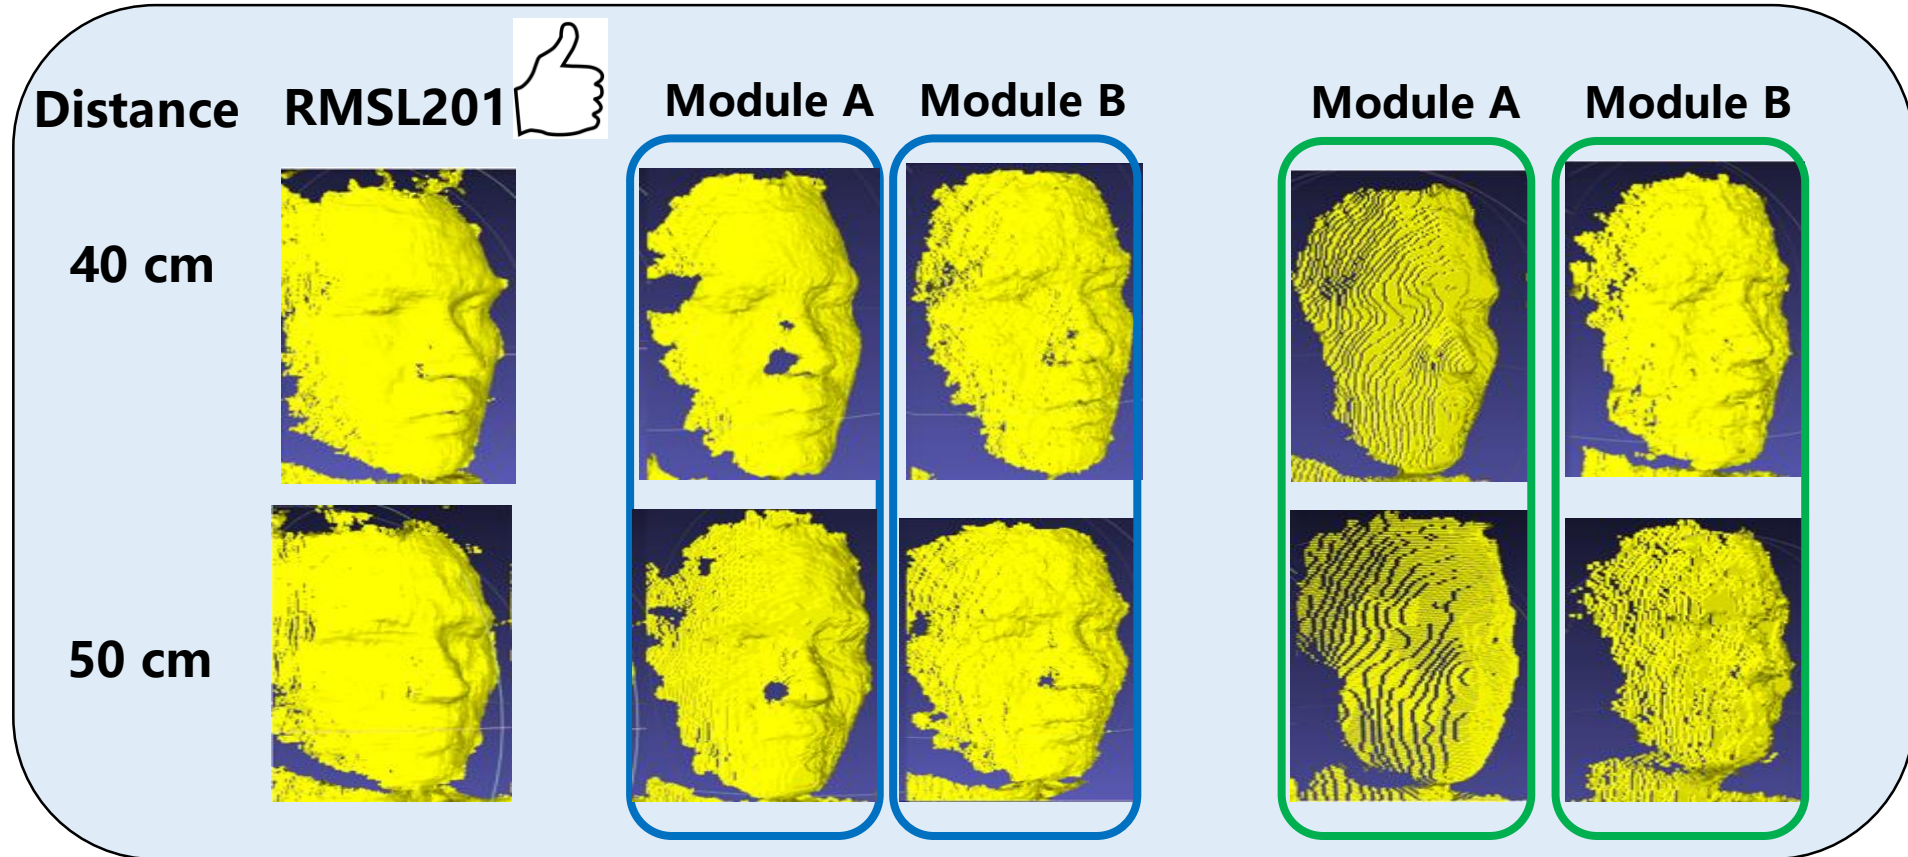

RMSL201

Advantage 2: More comprehensive and accurate 3D depth

Compared with other two modules in the market, we can find the advantages of RMSL :

1. The range can be covered more comprehensively.
2. The depth accuracy is more accurate.

Advantage 3: Full-stack solution

Image Processing Algorithm

Facial Recognition Algorithm

Optical Device

Systems Software

ISP Chip

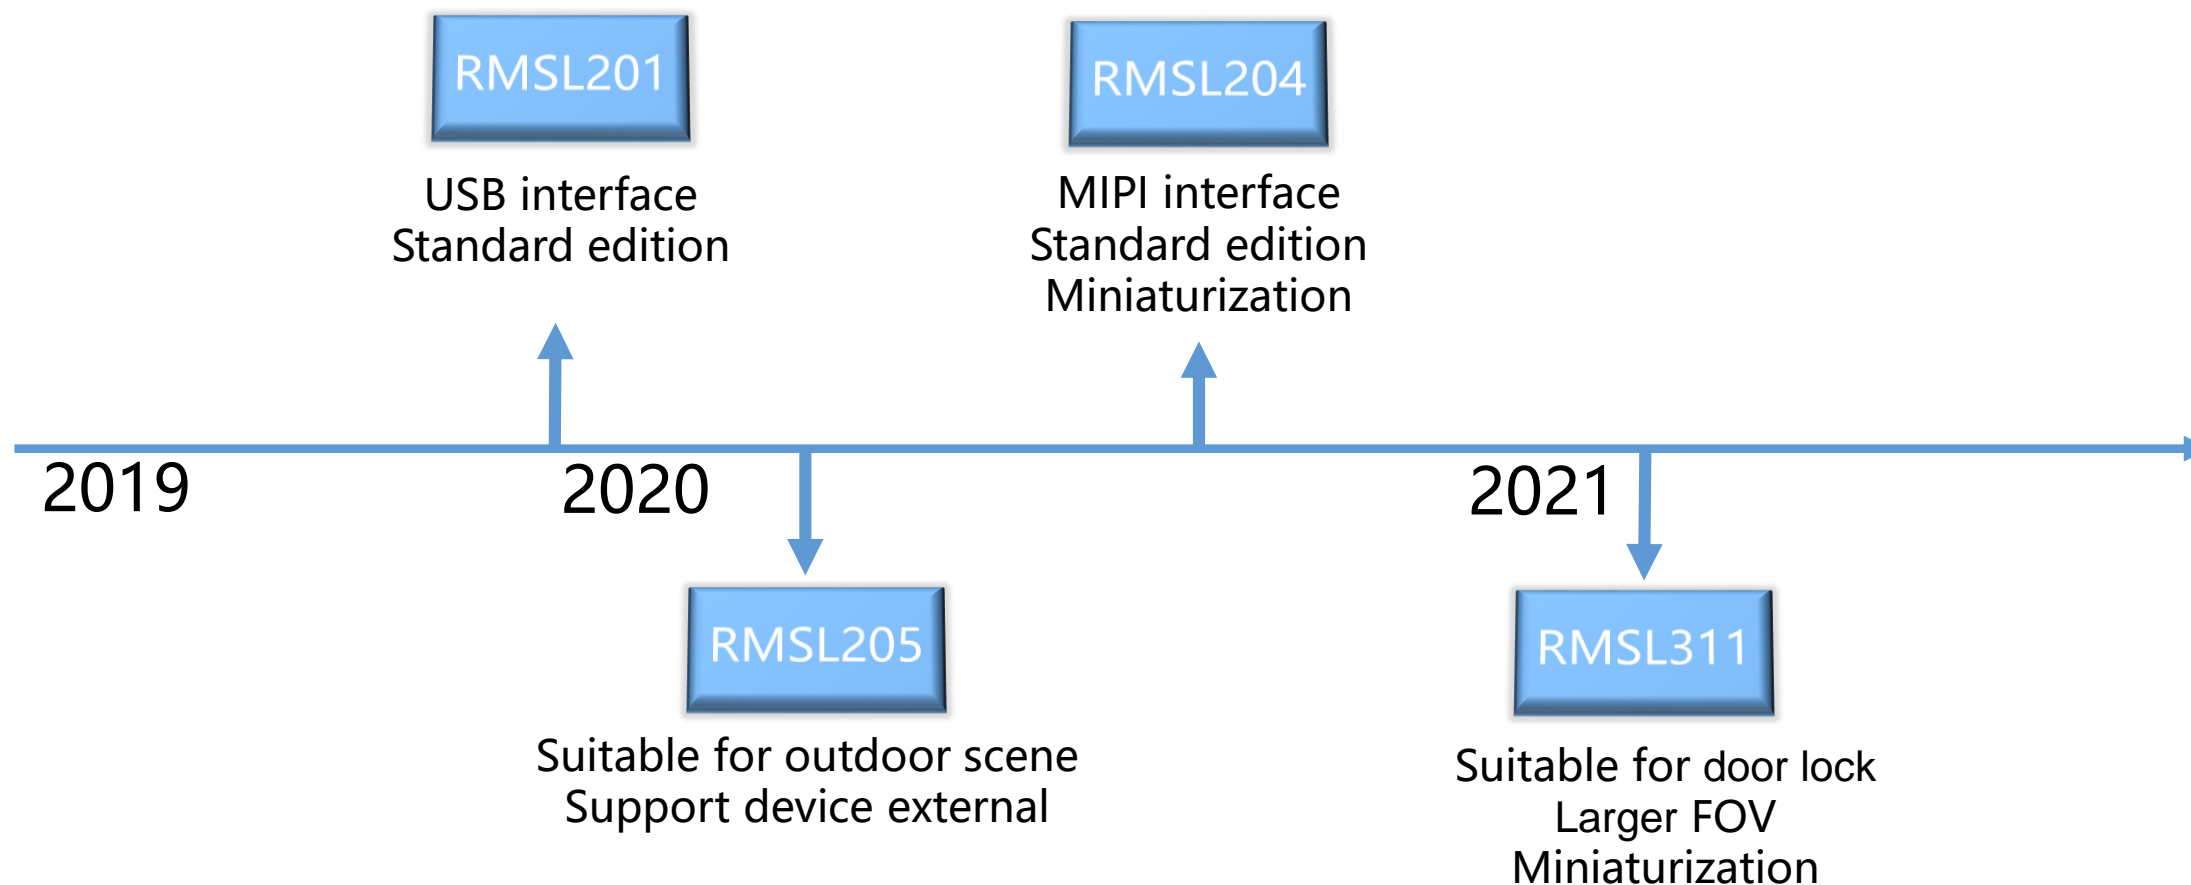

Image Co-processor

Device Structured Design

Support Customization

Roadmap of Rockchip Structured Light Module

Product Features——RMSL201

RMSL201

- USB interface
- Support **WeChat Pay, UnionPay**, etc.
- Passed **BCTC** certification
- Support outdoor identification up to 100,000 lux light
- Living-body recognition algorithm
- Embedded Security chip
- MP

Product Features——RMSL205

- Support device external after installation
- Three-profings design
- Support **WeChat Pay, UnionPay**, etc.
- Passed **BCTC** certification
- Support outdoor identification up to 100,000 lux light
- Living-body recognition algorithm
- Embedded Security chip
- USB interface
- MP

Product Features——RMSL204

RMSL204

- MIPI interface, Standard edition
- Support **UnionPay**
- Passed **BCTC** certification
- Miniaturization, which is suitable for handheld devices, such as POS machine.
- Pre-handling Algorithm
- No MP

Product Features——RMSL311

RMSL311

This is the design sketch.
products support customization.

- Miniaturization and suitable for door lock
- UART interface
- Larger FOV
- Support outdoor identification up to 100,000 lux light
- Support identification at 0.6m distance, which can cover the height from 1.3m to 2m.
- Facial recognition algorithms to achieve face recognition speed of less than 1s.
- No MP

Thank you!
