ACCESSING RIGHTFIND ADVISOR

You can access RightFind Advisor in the following ways:

User Name and Password Access

1. To access RightFind Advisor, visit <https://rightfind.copyright.com>.
2. If not connected to your organization's network, users are presented with a **'Welcome to RightFind'** page. To sign in, click the **'SIGN IN NOW'** box.

For IP Access:

Set up of RightFind is based on your organization's IP address(s) or with individual usernames passwords.

If connected to your organization's network, you are presented with the RightFind homepage. To sign in, click the **'SIGN IN NOW'** button in the top right corner.

SEARCHING

The RightFind index contains 100M+ articles.

RightFind lets you search across articles, publications, authors, or publishers.

RightFind allows you to search through a basic search, as well as advanced search. Some useful tips when using the basic search:

1. **Searching for specific article:** Use quotations when searching for a specific article (for example, “breast cancer”). This only retrieves results with the exact phrase “breast cancer.”
 - a. If you do not use quotations, RightFind returns results with all of your search terms. If you enter breast cancer, RightFind retrieves results with the terms “breast” AND “cancer.”

USING COPYRIGHTED CONTENT

Next to every article in RightFind there is a link: **“How can I use this copyrighted content?”** as shown below.

The screenshot shows the RightFind search interface. At the top, there's a search bar with the text '10.1002/CNCR.28862'. Below the search bar, there are tabs for 'All', 'Publications', 'Articles/Chapters', and 'More'. To the right of the search bar is a magnifying glass icon and a link to 'Advanced Search'. Below the search bar, there's a 'Search Tips' link. On the left side, there's a section 'Narrow your results:' with the text 'No filters are available'. In the center, there's a section 'Results: 1-1 of 1' with a '25 Results/page' dropdown and 'Previous' and 'Next' links. The main result is for the article 'Oncolytic polio virotherapy of cancer' by Brown, Michael C., Dobrikova, Elena Y., et al. The article is from 'Cancer', 01 Nov 2014, Vol. 120, Issue 21, pages 3277 - 3286. The ISSN is 10970142, PMID is 24939611, and the Language is English. The DOI is 10.1002/CNCR.28862 and the Publisher is JOHN WILEY & S... To the right of the article title, there is a button that says 'How can I use this copyrighted content?'.

Click this link to get rights information about how you may use a specific article based on the rights covered by your CCC Annual Copyright License. Rights are grouped into three main categories:

- Digital sharing
- Photocopy sharing
- Responsive rights

RightFind displays easy-to-view icons letting you know if an article is covered under the license:

Covered under your license

Covered under your license with additional information or conditions provided by publisher

Not covered under your license

To see a complete list of available rights and permissions, click the **“View more uses”** link to open the Rights Summary Page.

Combined modality therapy for esophageal cancer.

Minsky BD¹.

Author information

Abstract

Treatment approaches for esophageal cancer include primary treatment (surgical or nonsurgical) or adjuvant treatment (preoperative or postoperative). Primary treatments include surgery alone, radiation therapy alone, and radiation therapy plus chemotherapy (combined modality therapy). Adjuvant therapies include preoperative or postoperative radiation therapy, preoperative chemotherapy, and preoperative combined modality therapy. There is considerable controversy as to the ideal therapeutic approach. This review will examine the results of these approaches as well as combined modality therapy using novel regimens.
