**Percent of
positive tests***

Overall Numbers:

18490

**Total
Cases**

765

**Total
Hospitalized**

425

**Total
Deaths**

15246

**Total
Recovered**

*The number of tests and positive tests include individuals that have been tested multiple times and includes out-of-county residents that are tested with-in St. Clair County.

This report is provisional and subject to change. As public health investigations of individual cases continue, there will be corrections to the status and details of referred cases that result in changes to this report. Weekly totals and averages only include changes for the reported week. Total cases to date for hospitalizations, deaths and recovered can be double counted (e.g. a person that has recovered and was hospitalized will count for both totals).

Total Cases: The total number of probable and confirmed cases following CDC guidelines investigated by St. Clair County Health Department.

St. Clair County COVID-19 Data:

7-Day Average of New Cases*

This report displays the running 7-day average number of new Covid-19 cases, both confirmed and probable cases. For each date a 7-day average of all cases is displayed along with a 7-day average of all cases excluding long term care facilities and the jail.

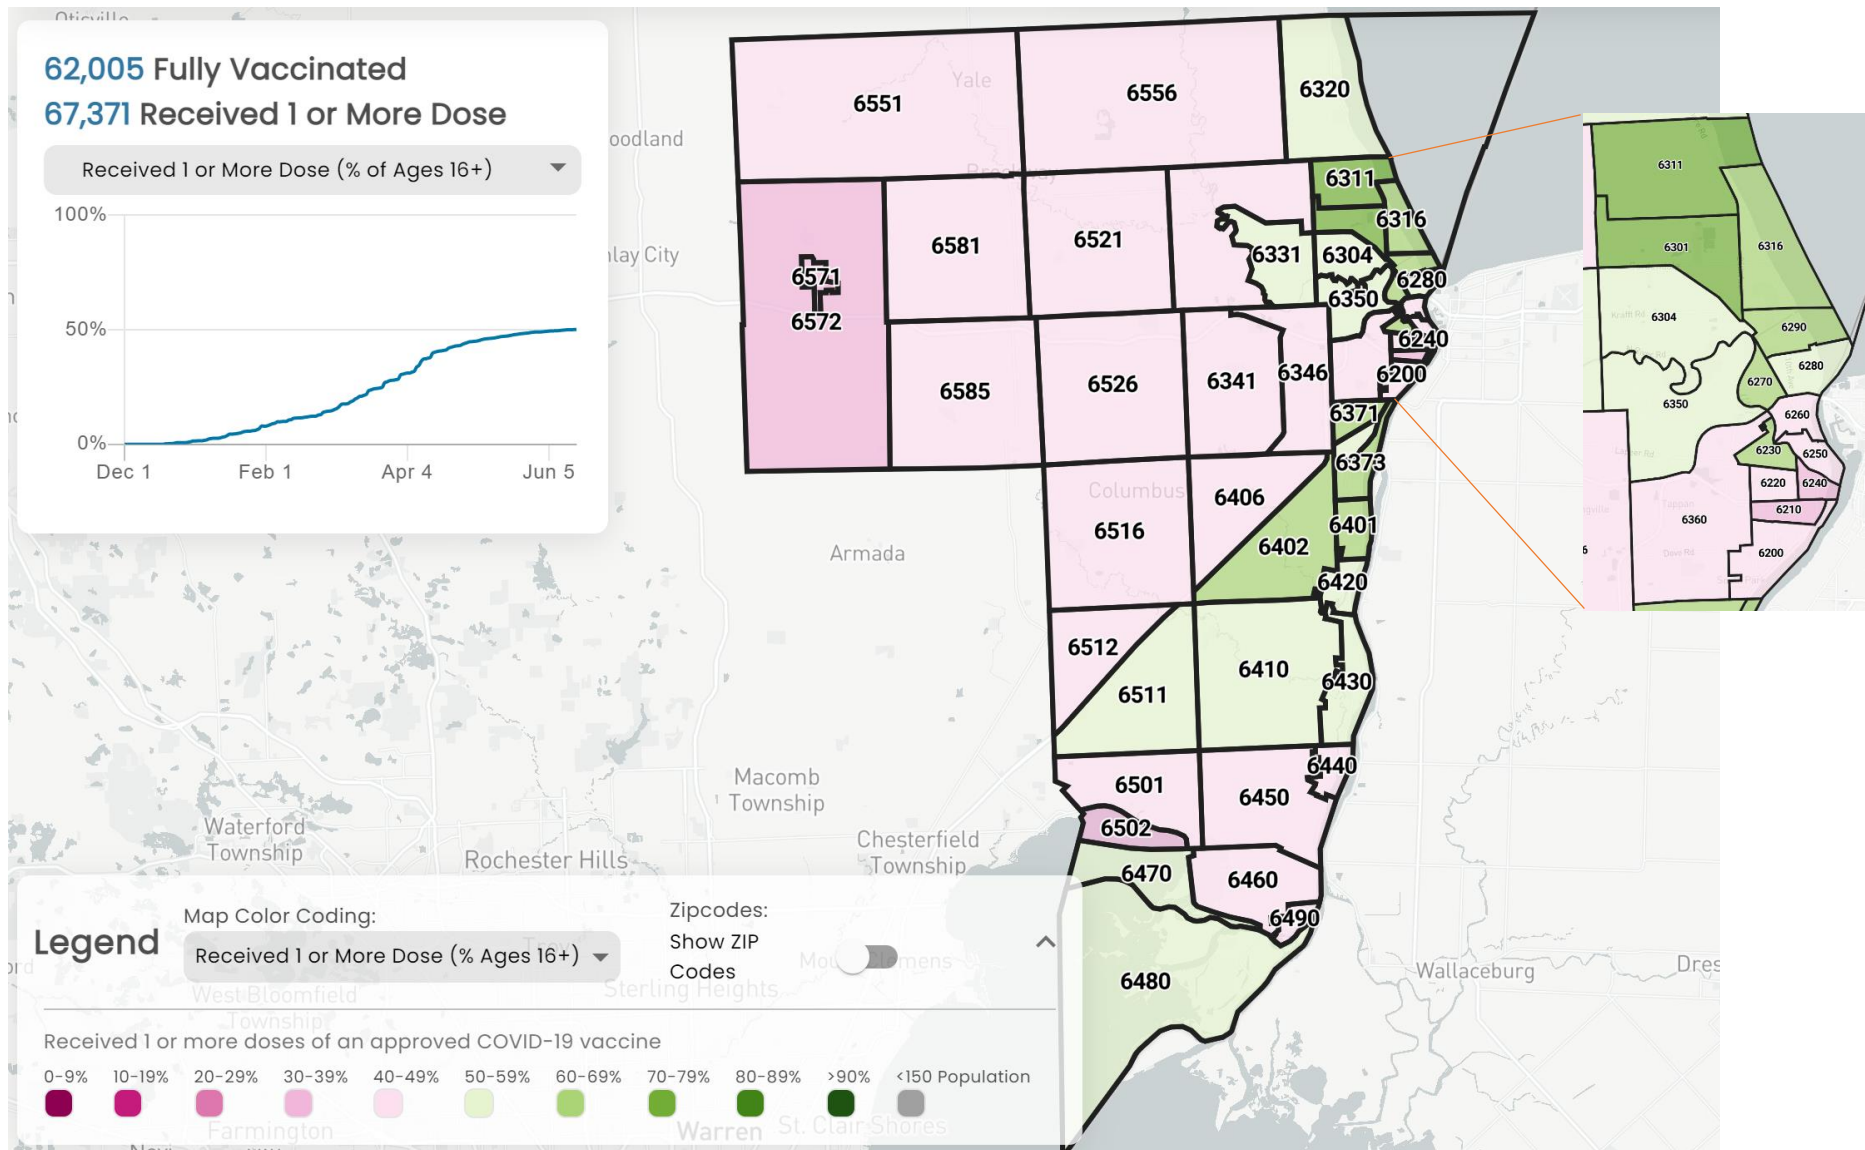

*This report is provisional and subject to change. As public health investigations of individual cases continue, there will be corrections to the status and details of referred cases that result in changes to this report. Information based on Referral Dates.

St. Clair County COVID-19 Vaccine Data:

Total Number of COVID-19 Vaccine Doses Administered to SCC Residents	120,372
Total Number of COVID-19 Vaccine Doses Distributed to SCC Providers	135,490
COVID Vaccination Coverage for SCC Residents (12 & Older)	48.5%
COVID Vaccination Coverage for SCC Residents (65 & Older)	74.6 %

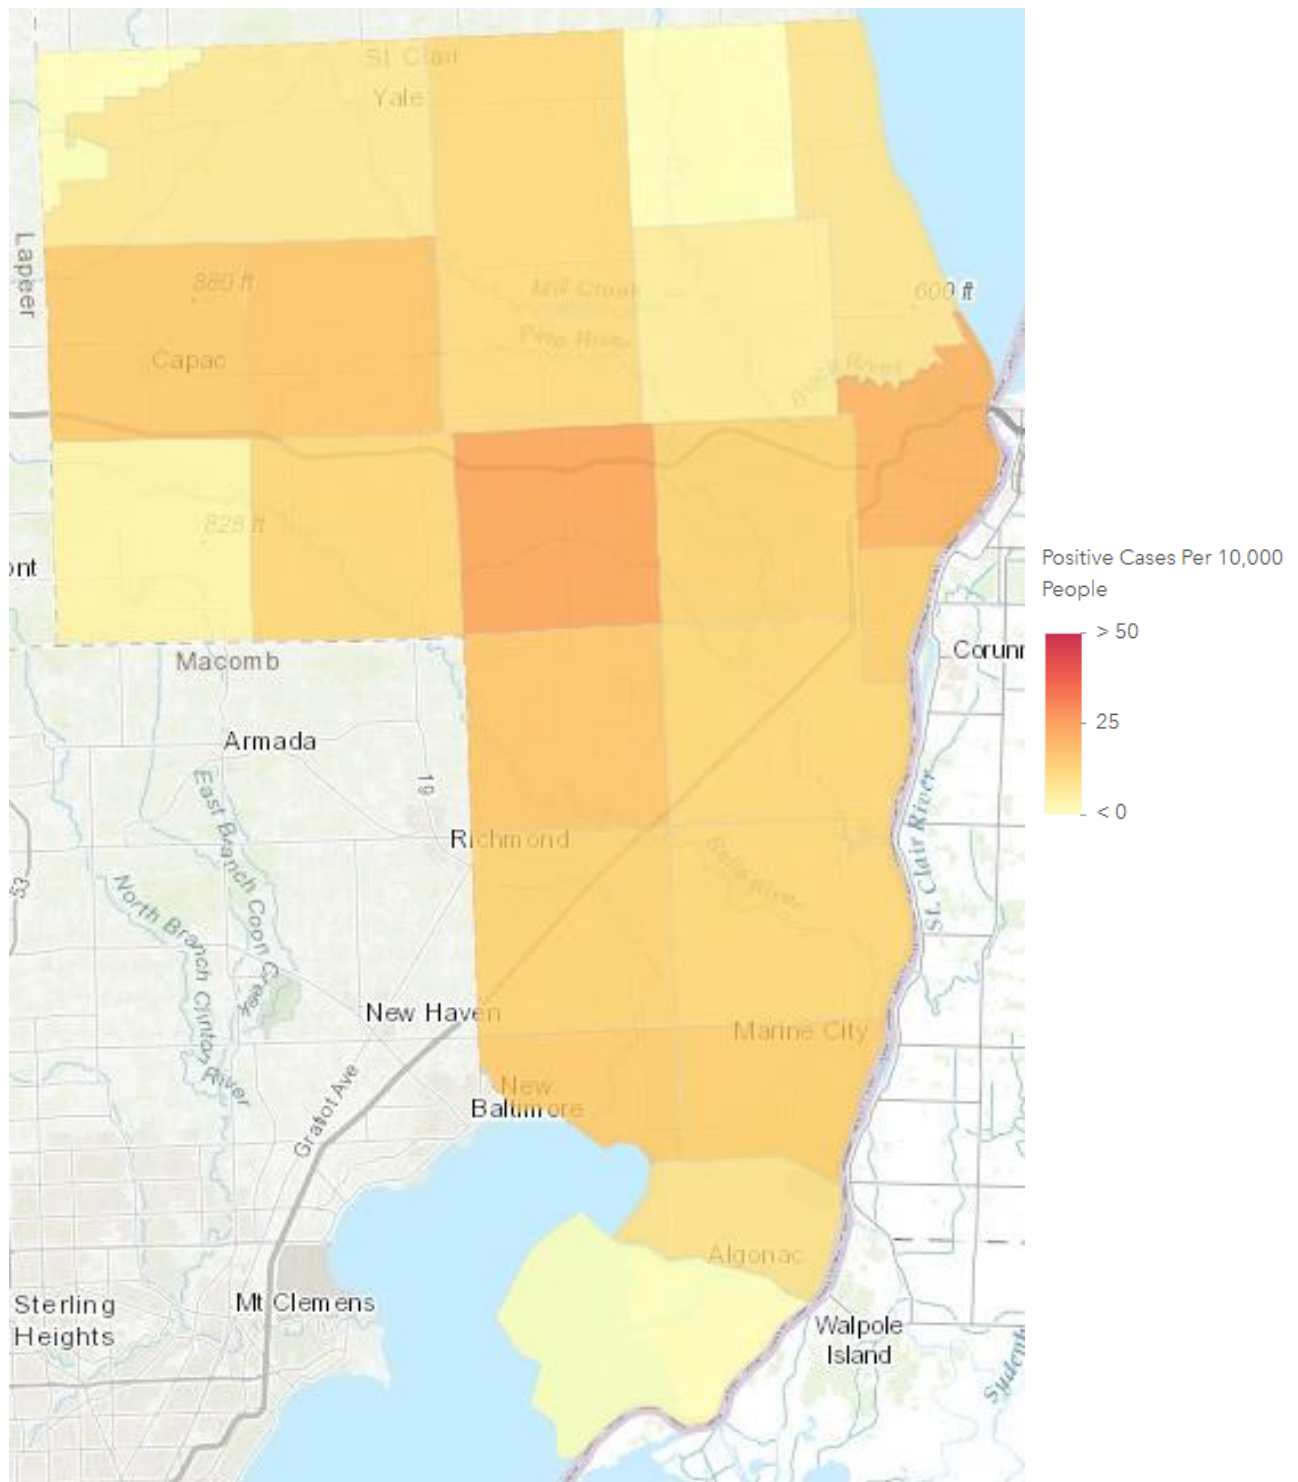

Doses administered were reported based on individual's residence and the date they were vaccinated. Vaccine coverage is the percentage of people receiving one or more doses of vaccine. Coverage is calculated using the doses reported in MCIR divided by the US Census population estimate for persons 12 years and older. This report is provisional and subject to change. Data obtained from MDHHS ([Michigan.gov/COVIDVaccine](https://michigan.gov/COVIDVaccine)).

Vaccine coverage (1st dose) by census tract. Four digit census tract numbers displayed on map. This report is provisional.

COVID-19 Cases (per 10,000 population)
Period: 5/19/2021 to 6/17/2021

This report displays the total number of COVID-19 cases referred to the St. Clair County Health Department within the given report range as listed above. Case numbers are displayed by home address. The number of cases in a zip code was adjusted 'per ten thousand' people scale so that zip codes could be easily compared. Data for this report was from the Michigan Disease Surveillance System (MDSS). This report is provisional and subject to change. As public health investigations of individual cases continue, there will be corrections to the status and details of referred cases that result in changes to this report.
